When Select Input Part No Button is pressed the respective Popups based on 'Part is Made From' drop down appears ... (existing mapping holds)

If the selected RM Part No is of RM Type where Multiple Parts made from 1 Input RM = N then copy the RM Wt to the Input Wt Field ... In this case it is a view field

Multiple Parts made from 1 Input RM = Y then allow mandatory entry of wt

This is required for calculation of RM Qty in Production Planning

Check if Input wt <= Fin Wt x No of Fin Parts made per input Part

If condition not met show warning msg "Check Scrap Weight ..."

Current Popup for add RM Type is called

The current popup is titled "Add Raw Material Type" and features a close button (X) in the top right corner. It contains a label "Raw Material Type" next to a text input field with the placeholder "Enter here". At the bottom right, there is a blue "Add" button. The background shows a blurred interface with labels like "Bench", "etails", "Balloc", "Customer Sup", and "Standard Purchased RM".

Modified Popup for add/edit RM Type

The modified popup is titled "Add/Edit Raw Material Type" with a red close button (X) in the top right corner. It includes a text input field with the placeholder "Enter RM Type". Below this, there is a label "Raw Material Type" followed by a red asterisk (*). A new checkbox labeled "Multiple Parts made from 1 Input RM" is added below the input field. A blue "Save" button is located at the bottom right.

This is new field to be added to the RM Type table
